PROFESSIONAL SUMMARY

Full-stack web developer with experience in web application development, MERN stack development, system design, QA testing, and deployment. Experienced in developing and maintaining web applications, leading internship projects, preparing technical documentation, and implementing solutions based on project requirements and feedback. Skilled in modern development technologies, AI-assisted development.

WORK EXPERIENCE

Junior Full Stack Developer *May 2026 - Oct 2026*
TechnoPH Systems & Integration Inc.

- Developed and maintained web applications based on project requirements.
- Connected a web application with Electron.js to support desktop application functionality.
- Tested applications, investigated issues, and resolved bugs to improve reliability.
- Delivered feature updates and system improvements based on testing results and project needs.

Intern Web Developer / Project Lead
TechnoPH Systems & Integration Inc. *Feb 2026 - May 2026*

- Led two internship projects, coordinating a five-member team on one project and collaborating with interns across the organization on another.
- Prepared system plans and diagrams, including flowcharts, data flow diagrams, database designs, and page flows, to guide development.
- Independently developed an Intern Daily Time Record (DTR) Management System using the MERN stack for attendance tracking, access control, and intern record management.
- Built attendance features for time-in/time-out logs, break monitoring, late and overtime tracking, and PDF/Excel report generation.

KEY PROJECT

Donor-Recipient Matching System
Capstone Project

- Led system planning, design, and development for blood donor matching and request management.
- Developed a JavaScript-based TOPSIS algorithm to rank eligible donors by blood compatibility, location, donation eligibility, and response history.
- Integrated SMS notifications, PIN verification, Mobile Blood Donation tracking, and a Google Gemini-powered chatbot.
